

School Wide Plan Summary East Elementary

East Elementary is committed to giving students extra time and support to master concepts to increase student achievement. Our goals this year are:

- We will increase the number of student's proficient in Language Arts, Math, and Science on end of year testing by 3%.
- Each student will achieve 100% on their grade level GVC's.
See the grade level teacher for each specific goal in Language Arts and Math
- We will increase the number of students proficient on the DIBELS testing from:
1st grade 45% to 67% 2nd grade 62% to 67% 3rd grade 61% to 72%

Teachers will be meeting for two hours each week to discuss and focus on the results of student achievement and academic growth. Regularly we will monitor student learning progress and our primary focus will be on learning. From the data we will make action plans for intervention. We will be using small group instruction and strong tier I instruction to ensure learning for all students.

We will provide training during Professional Learning Communities and on-site staff development. We will also have select teachers attend educational conferences that are focused on best practices and research based instructional strategies. We will have school wide training in writing and student engagement for all teachers. We are also providing technology training and 1 to 1 devices for students to magnify engagement and provide additional opportunities for individual practice in order to meet our academic goals.
