Spring Recess (No School)

Dear Jaguar Parents and Students,

Happy March!

This school year is going by so fast! Hopefully your child has shared with you some info on our ROAR positive behavior program that was started recently. We have loved seeing our students work so hard to make our school a positive place! Each day we have many kids coming to turn in their ROAR slips because they were caught doing something that we feel is important at our school. If you get a chance, check out some of the information on what we expect from our students...it's posted on our website. Have a great Spring Break and come back ready to learn!!!

Spring Forward

DAYLIGHT SAVING TIME

Here's a look at seven things you may not have known about daylight saving time:

1. "Spring forward and fall back" is an easy way to remember how to set the clock when daylight saving times begins and ends. You [set your clock forward](#) one hour at 2 a.m. on March 11. You'll set it back one hour at 2 a.m. on Nov. 4.
2. In the United States, [daylight saving time began](#) on March 21, 1918. U.S. government officials reasoned that fuel could be saved by reducing the need for lighting in the home.
3. Ancient agrarian civilizations used a form of daylight saving time, adjusting their timekeeping depending on the sun's activity.
4. Many people call it daylight savings time. The official name is daylight saving time. No 's' on 'saving.'
5. Benjamin Franklin came up [with an idea to reset clocks](#) in the summer months as a way to conserve energy.
6. A standardized system of beginning and ending daylight saving time came in 1966 when [the Uniform Time Act](#) became law. While it was a federal act, states were granted the power to decide if they wanted to remain on standard time year-round.
7. Arizona (except for the Navajo, who do observe daylight saving time on tribal lands), Hawaii, American Samoa, Guam, the Northern Mariana Islands, Puerto Rico and the United States Virgin Islands do not observe daylight saving time.
