

COMMUNITY COUNCIL MEETING MINUTES

NOVEMBER 7, 2019

MEETING STARTED AT 2:46

Those attending were: Mr. Gregoire (principal), Ginny Nobis (conducting), Alicia Gubler, Lora Madison, Kelcie Schmalz, Brittney Johnson, Kate Valladolid, Stephanie Tucker and Angie Oliver.

As per the addenda:

1-Parking drop off and pick up.

The parking lot situation has seen much improvement since our 9/5/19 after implementing the suggestions from that meeting. Parents are understanding the process and better traffic flow has been markedly noticeable. Lego League is involved in a project called City Shaper which identifies and proposes a solution to a problem in our community. They have identified out front pick up zone as a problem. Madison Paxton and Peyton Hofheins, along with their advisor, Mrs. Turner, presented their findings to the committee. They propose that we paint yellow arrows and identify, also by painting, a PULL THROUGH ONLY and a PULL FORWARD zone. The plan was accepted by the committee and Lego League will start painting on Jan. 6th, 2020.

2-Science Program

Angie Oliver gave us an update and overview of the science program. The program has evolved into a 1 hour block of time once a week to supplement what the teachers are teaching in their classrooms. They are learning vocabulary words and have an activity. Mrs. Oliver said that things are going very well. She keeps in close contact with the teachers, meeting with the regularly. The students are loving science and learning a lot.

3-Americorp Program

The Americorp Program is being run this year by Hannah Johanson. Americorp is one on one tutoring for students who struggle with reading and writing. Adult volunteers in the community come at least 2 mornings a week to help tutor students from 1st to 4th grade.

Each student gets two 30 minute one on one sessions a week.

We also have before school peer tutoring where older students (4th and 5th grades) are able to help tutor younger students (1st and 2nd grade). The students love it

We currently have 9 adult volunteers, 12 student tutors and 40 students being tutored.

4-Technology-Digital Citizenship

Netsmart is coming on 2/25/20 to help our students meet the requirements for acceptable use of the internet. There will be two sessions: k-2 and 3-5 grade.

The next meeting will be held on February 5th.
