

**WATER CANYON ELEMENTARY
SCHOOL-WIDE PLAN SUMMARY
2017-2018**

Water Canyon School strives to be successful in all matters related to student achievement. Our highly qualified teachers identify and teach essential state curriculum standards. Comprehensive intervention programs are instituted to ensure that every student learns at high levels. Water Canyon's goal is to increase student proficiency along all grade levels while helping students achieve ongoing, upward growth.

Water Canyon School will continue a parental, community outreach effort. Water Canyon communicates regularly with parents through one on one contact, up to date emails, a phone and email messaging service, as well as Facebook and other social media avenues.

Water Canyon continually utilizes and upgrades technology as a tool to enhance teacher instruction and student performance. Our technology is continually improving in the form of up to date hardware, software for student learning and assessment, and technical expertise for support.

Within efforts to improve our performance as a school, Water Canyon provides Professional Learning Communities where teachers are exposed to focused strategies to help students improve performance. Priorities are given to collaborative learning teams, peer coaching, and self reflection. Through the use of real time data, teachers and students have opportunities to know precisely what they have learned and identify specific areas of improvement that may be necessary.
